

## RESUME

Name: Ruben Romao

Email: rubenromao@gmail.com

Phone: +44 (0) 7440 56 26 56

Location: London, United Kingdom

### **About:**

I'm an Adobe Certified Professional Magento Developer with 10 years' experience and highly proficient with Magento architecture.

I worked with Magento v1.7 all the way up to projects using v2.4.6.

I'm proactive, with strong skills in Magento 2, implementing best practices, coding standards and delivery of high quality code keeping it simple as it can be.

I also have DevOps skills. I'm very comfortable setting up a Linux web server.

---

### **Core Skills:**

- PHP
- Magento
- JavaScript
- HTML

### **Soft Skills:**

- Go
- Laravel
- Symfony

**Certifications:** [Adobe Certified Professional - Adobe Commerce Developer](#)

**Education:** College - IT Engineering.

**Languages:** Fluent in English, Spanish and Portuguese.

**Extra Education:** I have 7 years of Classical Guitar in the Lisbon Music School.

I am part of the [M.Academy](#) where I keep learning more and more about Magento 2 with regular training.

### **Code Samples:**

- Rubenromao\_Blog is a module that covers most of the Magento 2 concepts and design patterns:  
<https://github.com/rubenromao/m2-module-blog-posts>
  - More Magento 2 exercise/example modules can be found on my GitHub:  
<https://github.com/rubenromao>
-

## **Professional experience**

Company: Kick Interactive Ltd

Duration: June 2023 – September 2023 (Part-time & fully remote)

Position: Senior Magento Full Stack Developer.

Projects:

- ChampionTimber (<https://www.championtimber.com>)
- MP Moran (<https://www.mppmmoran.co.uk>)
- MGMTimber (<https://www.mgmttimber.co.uk>)
- Instinct (<http://staging.instinct.co.uk>)

Responsibilities:

- Bistrack ERP Rest Api improvement and maintenance.
- Magento upgrades.
- Upgrade some projects from PHP 7.4 to 8.1.
- Code refactoring to be compliant with Magento 2 coding standards and best practices.

Refactoring:

- Custom Magento 2.4.5 modules upgraded to support PHP 8.1.
  - Bistrack ERP API refactoring (CRUD for orders, products, customers).
  - Refactoring of 3rd party modules.
- Timberlake Consultants Ltd (<https://www.timberlake.co.uk>)

Responsibilities:

- Implementation of multi-websites multi-stores with multi-currency.
  - Custom Module to allow customers to add participants per Course and show the participants in the admin panel order detail per item (Course).
  - Magento upgrade from v2.4.4 to v2.4.5-p4.
- ZLT Electrical Ltd (<https://www.electricalcounter.co.uk>)

Responsibilities:

- Magento upgrade/migration from 2.4.4 CE to Adobe Commerce 2.4.6-p3.
- Upgrade of PHP from PHP 7.4 to 8.2 on the dev server (Digital Ocean).
- Adobe Commerce Cloud environment configuration using the cloud configuration files, cloud commands and ece-tools
- Deploy to Adobe Commerce Cloud integration environment.
- Deployment of media content database.

Technologies / Tools:

- Magento 2.4.5, 2.4.6 CE,
  - Adobe Commerce Cloud Pro Plan v2.36.5 with Adobe Commerce 2.4.6-p3.
  - PHP 8.2, MySQL 8, JavaScript, JQuery, OpenSearch, Git (GitHub), Xdebug 3, PHPStorm, Docker.
  - Jira, Confluence, Mantis, Synergist, Slack.
  - Maintenance, installation and configurations of LEMP on Digital Ocean Servers (CentOS 7/8).
-

Company: Digital Boutique Ltd

Duration: April 2022 – June 2023 (Permanent & fully remote)

Position: Senior Magento Full Stack Developer.

Projects:

- Slater Menswear (<https://www.slaters.co.uk>)
- Lola Rose (<https://www.lolarose.co.uk>)
- Salt-Water Sandals (<https://www.salt-watersandals.com>)
- ETB Tech (<https://www.etb-tech.com>)
- Cots Would (<https://www.cotswolds.com>)
- Milk & Blush (<https://www.milkandblush.com/>)
- LCFC (<https://shop.lcfc.com>)
- Floris London (<https://www.florislondon.com>)
- Novuna - PayByFinance (<https://www.novunapersonalfinance.co.uk>)
- PJ PAN (<https://www.pjpan.co.uk>)
- Stoneridge (<https://www.stoneridge.com>)

Integrations:

- Custom Magento 2.4.5 modules, PHP 8.1.
- Payment methods: SagePay (Opayo), Stripe, PayPal, Apple Pay, Klarna, Amazon Pay, Google Pay, PayPal Finance.
  - Sage200 integration (ERP, stock, order, products).
  - Global multi-store, multi-currency stores.
- Refactoring of 3rd party modules.
- Magento app that connects magento to the Novuna application portal.
- Based on “magento/docker” by Mark Shust, I created a docker base suite for local development to avoid local project setup avoid time waste.

Integration of 3<sup>rd</sup> party modules:

- Amasty\_Sorting
- Fooman\_PdfCore, Fooman\_PdfCustomiser – Layout changed to match client requirements.

Responsibilities:

- Magento 2.x stores migrations to Magento stable version 2.4.5-p1.
- Code review and code refactor.
- Migration of a Magento 1 store to Magento 2.4.5-p1.
- Upgrade all projects from PHP 7.x to 8.1.
- Refactoring of old code to be compliant with Magento 2 coding standards.
- Digital Marketing Tool for Novuna:
  - Architecture and development of a “Digital Marketing Tool”, written in Go.

The DMT was designed to make API requests to “Goggle PageSpeed Insights API” and “Similar Web API” endpoints to fetch metrics on a schedule basis (cron).

The request payoff was a JSON object that was parsed to get the needed data and then stored into the database.

A dashboard was created so the clients could have the ability to view their store metrics and also the ability to export/download them within a time range, if wanted, into a CSV file.

Technologies / Tools:

Magento 2.3/2.4 CE / Commerce Cloud 2.4, PHP 8, Go 1.19, MySQL 8, MariaDB, Postgresql, Xdebug 3, REST APIs, Docker, Warden, Git (GitHub, Bitbucket), RabbitMQ, shellscripts, JSON, Rest APIs, PHPStorm, Slack, Jira, Confluence.

---

Company: Rezolve Limited. <https://www.rezolve.com/>

Duration: March 2017 – April 2022 (Permanent & fully remote)

Position: Senior Magento Developer.

Headless Magento.

Rezolve is an APP that works mainly as a marketplace for customers.

Magento is in the back scene where any merchant can register and sell their products.

Project Description:

The product is an APP that works mainly as a market place with merchants' stores. Each merchant has access to his own Magento instance to manage catalog, sales, shipping, customers etc.

- Custom CRUD Rest API Endpoints:  
Module with all needed custom endpoints used by the mobile SDK:
  - Merchants' registration into the Marketplace.
  - Create and authenticate customers.
  - Products endpoints for all product types.
  - Custom options.
  - Quote endpoint for the cart items.
  - Place order endpoint.
  - Order state change upon success payment request from the SDK.
- Migration of the Rest APIs to GraphQL.
  - Due to GraphQL being a high-performance and lightweight I started the migration of some of our custom endpoints to GraphQL.
- Custom Modules
  - To meet the business logic custom modules were implemented to change core classes using Plugins, Preferences, dataprovider and UI component.
  - Custom Console Commands.
- Api2Cart Integration:  
I built a Magento module to sync external Shopify and BigCommerce stores.
- Migration of the project from Magento 1.9 to 2.2.
- Magento upgrades all the way since 2.2 until 2.4.3 in order be PCI compliance.

Technologies / Tools:

- Magento 2 (2.1.7 - 2.4.3)
  - PHP 7.1/7.4/8.1, Xdebug, JavaScript, JQuery, GraphQL, REST APIs, shellscript, JSON, Swagger, phpunit functional tests.
  - Docker, k8s, AWS, EC2, S3.
  - Git (Bitbucket & GitHub), Slack, Jira, Confluence, Postman, PhpStorm.
-

Company: Salmon Ltd. Client: <https://www.goedhuis.com> (Wine Retailers).

Duration: September 2016 – February 2017(Contractor).

Position: Senior Magento 1 Developer.

Project Description:

- Integration of Sagepay Payment Gateway
- Development of custom Modules such as:
  - Extension to overwrite add to cart behavior to allow multiple Childs of Configurable product to be added to the cart.
  - Extension to overwrite default Url Key so it can add to the start and the end of the Url Key one attribute. An Observer was created as well so on save product it can create the custom Url Key.
  - Module to create/insert all custom static blocks.
  - Script to import all Wines images from an FTP server and place them programmatically into Product Media Gallery.

Technologies: PHP5.6, MySQL5, html, CentOS, apache, Magento CE 1.9.2.4, Git (Bitbucket), Jira, PhpStorm.

---

Company: Buzzbeat Lda. Client: <https://www.nustone.co.uk/> (wall and floor products)

Duration: April 2016 – August 2016 (Contractor).

Position: Magento Developer.

Project Description:

- Upgrade old store from Magento 1.8 to 1.9.2.4
- Implementation and customization of the new theme (stg.nustone.co.uk)
- Corrections to the old code.
- Migration from the old server to the new server.

Technologies: PHP5.6, MySQL5, Javascript, Ajax, html, css, Shell Script, Debian, apache, redis, Magento CE 1.9.2.4, Git, GitLab, PhpStorm.

---

Company: [www.FactionSkis.com](http://www.FactionSkis.com) (Skis and skiing outerware and apparel products)

Duration: August 2015 – December 2016 (Contractor).

Position: Magento Developer.

Project Description:

- Upgrade old store from Magento 1.8 to 1.9.2.2
- Implementation of the new html custom layout into a Magento package theme from scratch.
- Implementation of WorldPay Payment Gateway.
- 3th Party Odoo connector installation and configuration.
- Backup system.

Technologies: PHP5.4, MySQL5, Javascript, Ajax, html, css, bootstrap, Shell Script, Linux, Zend Server 8, Magento CE 1.9.2.2, Git, GitLab, Jira, PhpStorm.

---

Company: [www.PinPointDesigns.co.uk](http://www.PinPointDesigns.co.uk)

Client: [www.lumitrix.com](http://www.lumitrix.com)

Duration: May 2015 – July 2015 (Contractor).

Position: Magento Developer.

Project Description:

- Extension of the Newsletter Core Module to Gather the date of birth.
- SagePay Payment Gateway module integration.

Technologies:

PHP5, MySQL5, Javascript, Ajax, html, css, Linux, Magento CE 1.8.0, Git, GitHub, Tower, PhpStorm.

---

Company: [www.eMakina.com](http://www.eMakina.com).

Client: [www.seton.com](http://www.seton.com) / [www.seton.fr](http://www.seton.fr) / [www.seton.co.uk](http://www.seton.co.uk)

Duration: October 2014 – April 2015 (6 months' project, Contractor).

Position: Magento Developer.

Project Description:

- Extensions Development
- Extensions Customisation
- Extensions Optimisation

Technologies:

PHP5, MySQL6, Javascript, Ajax, html, css, Perl, Shell Script, Linux, Zend Server 7, Magento EE 1.12, Agile, Git, JIRA, Bitbucket, PhpStorm.

---

Company: [www.Familybrands.com](http://www.Familybrands.com). (All kind of products from books to clothing)

Duration: August 2013 – September 2014.

Position: Magento Developer.

Project Description:

Architecture from scratch, coordination and development of a Magento based Stores with a single Admin panel.

Phase 1: 3 Stores with two websites each ([www.perfumedepot.ie](http://www.perfumedepot.ie), [www.perfumesdepot.co.uk](http://www.perfumesdepot.co.uk), [www.booknote.ie](http://www.booknote.ie), [www.booknote.co.uk](http://www.booknote.co.uk), [www.homeandpc.ie](http://www.homeandpc.ie), [www.homeandpc.co.uk](http://www.homeandpc.co.uk)).

Phase 2: One main Website store with two Store Views ([www.familybrands.com](http://www.familybrands.com)).

- Rest API to handle 3<sup>rd</sup> Party services as warehouse stocks, shipping and Ogone Payment gateway.
- Extensions Customisation

PHP5, MySQL5.6 (Percona), Magento EE 1.12.0.2 & 1.13, Apache Solr, Memcache, Varnish, Soap WebServices, Apache2, Nginx, REDIS, ZendServer 6, html, css, JavaScript, XML, AJAX, Linux, PhpStorm.

---

Company: Talent Online Sales – [www.formafit.co.uk](http://www.formafit.co.uk) (Weight-loss supplements)

Duration: November 2012 - July 2013.

Position: Magento Developer.

Project Description:

- Architecture, coordination and development of a Magento multistore with a single Admin panel for [www.formafit.pt](http://www.formafit.pt), [www.formafit.es](http://www.formafit.es), [www.formafit.co.uk](http://www.formafit.co.uk), [www.formafit.it](http://www.formafit.it).
- Facebook APP contest for viral marketing, based on Facebook API, FB PHP SDK, FB Javascript SDK and FB Graph API

Technologies: PHP5, MySQL5, Magento CE 1.7.0.2, Facebook API, ZendServer 6, html, Javascript.

---

Company: Global8track, Lda – ([www.global8track.com](http://www.global8track.com)).

Duration: June 2012 – October 2012.

Position: PHP Developer/Team Leader.

Project Description: Architecture, coordination and development of a GPS tracking system. Coordination of the team and their functions on the project.

Development of:

- Listener that receives the data sent from the devices and put it in a log.
- Parser to treat the data that the listener saves in the log, made all the calculations and save the processed data into the database.
- Crons to generate reports and KMLs.
- Dashboard where the customers can see their fleet in real time, get reports, define waypoints, stopovers, alerts for: (waypoints; stopovers; geofences; panic; overspeed; fuel levels).

Technologies: PHP5 OOP, MySQL5, Google Maps API, html5, XML, JavaScript.

---

Company: Oasis Backpacker's Hostels Group – ([www.hostelsoasis.com](http://www.hostelsoasis.com)).

Duration: October 2011 – May 2012.

Position: Team Lead and Project Manager.

Project Description: Analysis and architecture of the whole hostel booking system.

The system consists on a PMS (Property Management System) a Booking Engine a Payment Gateway (Ogone) and an XML WebService that controls the bookings made in other systems such as booking.com.

PMS Demo: <http://pms.rubenromao.com/pms/> - user:admin/password:ruben

Booking Engine Demo: <http://pms.rubenromao.com/>

Technologies:

PHP5 OOP, MySQL5, html5, XML, JavaScript, JQuery, AJAX, SEO, WebServices, Apache2, Linux, Eclipse.

---

Company: Solferias, Travel Operator. – ([www.solferias.pt](http://www.solferias.pt)).

Duration: January 2012 – March 2012 (freelancer).

Position: WEB Developer and Mobile Developer for iPhone and Android.

Project Description: Development of an iPhone and Android App. This app allows the users to query the entire offers of Solferias in offline mode.

Technologies: PhoneGap 1.4, iOS 5.1, Android SDK, Eclipse, Xcode, HTML5, JavaScript, JQuery, SQLite3.

---

Company: WAYNEXT, Tecnologias da informação, Lda. – ([www.waynext.com](http://www.waynext.com)).

Duration: November 2008 – December 2011.

Position: WEB Developer.

Project Description:

- Development of the CMS used in all websites as the following sites build by me:
  1. Glintt – <http://www.glintt.pt>
  2. Angola online Newspaper – <http://jornaldeangola.sapo.ao>
  3. Angola Sports online Newspaper – <http://jornaldosdesportos.sapo.ao>

Technologies: PHP5 OOP, MySQL5, html 5, JavaScript, JQuery, AJAX, SEO, WebServices, Apache2, FreeBSD, SSH, VIM, Eclipse.

---

Company: SEGULA Technologies Portugal, S.A. – ([www.segula.pt](http://www.segula.pt)).

Duration: October 2006 – January 2008

Position: IT Expert Consultant - PHP/PERL Developer.

Projects Description:

ACIDI (Gouvernement beauro for imigration)

- Installation and configuration of Request Tracker (RT) 3.6. A very powerful Open Source tracking system.
- Database Migration from RT 3.0.9 to RT 3.6.1.

Vodafone Live UK:

- PHP (JPGraph)/MySQL with PERL scripts for database feeds.
